

**Project Development Phase**  
**Model Performance Test**

Date	10 November 2022
Team ID	PNT2022TMID28938
Project Name	Visualizing and Predicting Heart Diseases with an Interactive Dash Board
Maximum Marks	10 Marks

**Model Performance Testing:**

S.No.	Parameter	Screenshot / Values
1.	Dashboard design	
2.	Data Responsiveness	

3.	Amount Data to Rendered (DB2 Metrics)	 <p>The screenshot shows a web form for a heart risk calculator. The 'Input' section includes fields for Age (53), Systolic blood pressure (125), Total cholesterol (161), HDL cholesterol (55), On blood pressure medication (No), Cigarette smoker (No), and Diabetes present (Yes). The 'Results' section shows a Risk of 11.6%. A large blue male symbol is overlaid on the right side of the form.</p>
4.	Utilization of Data Filters	 <p>The screenshot displays a dashboard with two main charts. The top chart, titled 'Number of responses per second', shows a line graph with a blue area representing 'All' and a yellow line representing 'Active Users'. The bottom chart, titled 'Number of responses', shows a line graph with a blue area representing 'All', a green area representing 'OK', a red area representing 'KO', and a yellow line representing 'Active Users'. A green circle is overlaid on the right side of the bottom chart.</p>
5.	Effective User Story	The Heart Risk Calculator that has been created is serving all the needs and expectations of the user. As a User I can check my heart risk percentage in this effective dashboard.
6.	Descriptive Reports	The website is working to the fullest of its efficiency. As a patient with my laboratory reports I can check my risk percentage towards my heart in this website. This website contains separate pages for Men as well as Women.
